WHAT PIXPH DOES

Pixph is a keyboard-first capture workspace for Mac. Select text in any app, press Shift twice, then organize what matters by project and section, search it, complete it, attach files or drawings, or copy it forward as a clean list.

CORE WORKFLOW

- 01** Select text in any app.
- 02** Press Shift twice to capture it with source context.
- 03** Organize, search, attach files or drawings, complete, or copy it forward.

DRAWING

Open the focused editor from the Add menu or Command + double-tap Right Shift. Sketch freehand, add shapes or text, choose a color, then copy or attach the finished PNG.

KEY FEATURES

- Global keyboard shortcuts
- Double-Shift selection capture
- Projects and sections
- Fast full-library search
- Images, files, and drawings
- Markdown-aware notes
- Numbered, dashed, and plain lists
- Menu bar access
- Focused note windows
- Drag to reorder notes and sections
- Light, dark, and system appearances
- Optional update checks

PRIVACY AND PERMISSION

The Pixph app contains no product analytics or telemetry and keeps its library and managed attachments on the user's Mac. Accessibility permission is used to read selected text and recognize the double-Shift gesture; it is not used to continuously record activity or upload captures.
